

GLASS / 2022 / CHICAGO, IL

Star Award

Cast lead crystal trophy

A cast lead crystal star for the USFL's season MVP, hand polished, masked, and etched.

THE WORK

The MVP award for a season of the USFL. One of the finest awards someone could receive, and it had to look it.

THE MATERIAL QUESTION

A star in lead crystal, fully polished, with fine etched detail across its faces, on a silver base.

THE MAKING

We made two. Polishing every surface of a star form is its own challenge; masking and etching intricate detail across those polished faces is another.

IN PLACE

The league sent a driver with a briefcase built to hand carry it to the game. When the case was opened at the other end, the star had shattered. We still have the photographs.
